Hi Andy,

I just checked in with the On-Scene Coordinator. EPA is still working on the removal site evaluation. I will let you know of any updates.

Subject: Canadian Radium Site

Andy,

EPA has determined that the Canadian Radium and Uranium Corp. Site does not qualify for the National Priorities List, based on sampling data collected by EPA at or near the Site. EPA's Removal Program continues to perform a site evaluation to determine whether further removal activities at the Site are warranted. I will certainly keep you informed of any updates.

Regards,
Margo
